ARPA-E Fellowship Applications Due Aug. 15

ARPA-E is looking for the next generation of scientific leaders to help solve the most pressing and exciting challenges in energy. ARPA-E Fellows assist the agency in identifying possible breakthrough energy technologies through technical and economic analyses. During their two-year tenure, fellows undergo a full-immersion experience in energy technology development, engaging with world-class researchers in academia and industry, entrepreneurs and government officials. NSF Dear Colleague Letter: Change Makers

The National Science Foundation has issued a Dear Colleague Letter inviting innovative research and development proposals for projects that advance STEM learning while exploring solutions to multidisciplinary or transdisciplinary global challenges. Projects can involve formal or informal settings for learners of all ages and prior educational experience, including learners traditionally under-represented in STEM. Mechanisms of support include Advancing Informal STEM Learning, Discovery Research PreK-12, and Improving Undergraduate STEM Education. The DCL is expected to be in effect through March 1, 2017.
