CALS Funding Opportunities 10-31-2016

NPB Seeks Proposals that Address Antibiotic Use and Resistance, Due Nov. 15

The National Pork Board’s 2017 General Call includes a request for proposals in the area of antibiotic use and resistance. Topics include alternatives to antibiotics, environmental fate of antibiotics, antibiotic administration and mitigations. Preference will be given to projects that involve multidisciplinary approaches that may include academic and commercial collaborations. The Board is seeking proposals in several other categories as well. Proposals are due Nov. 15. More

Organic Farming Research Foundation Grants, Due Dec. 10

The Organic Farming Research Foundation is seeking proposals to fund research on organic farming and food systems and the dissemination of research results to organic farmers and the greater agricultural and research communities. Proposals can address any agricultural production, social, economic or policy-related topic of concern to organic farmers and/or ranchers. Proposal budgets can be a maximum of $15,000 for one year and are due Dec. 10. Contact the ISU Foundation cfr@foundation.iastate.edu to express interest. More

Graduate Grant Writing Course Offered for Spring 2017

Two sections of GR ST 569, “Grant Writing,” will be offered next spring. This one-credit, half-semester course will meet twice a week starting Jan. 9. Section 1 will meet on Monday and Wednesday from 10 to 10:50 a.m. and will focus on writing proposals for the National Science Foundation. Section 2 will meet on Monday and Wednesday from 11 to 11:50 a.m. and will focus on proposals for Fulbright programs and arts and humanities funding. The course will be co-taught by Ann Russell and Sandra Norvell. Contact: Ann Russell (arussell@iastate.edu, 294-5612).

DOE’s Tech-to-Market Team Requesting Information, Due Nov. 14

The U.S. Department of Energy’s Office of Energy Efficiency and Renewable Energy’s Tech-to-Market team has released a request for information seeking input from the broad energy innovation community in order to understand how it can best facilitate the transition of new clean energy technologies into the marketplace. In particular, Tech-to-Market is interested in understanding what specific mechanisms, such as new investment structures and public-private partnership models, could enable capital to flow at early development stages and smooth the path to commercialization. Responses are due Nov. 14. More
