Daily Research Career Development Award Applications Due March 2

Established as an estate gift from Carl A. and Grace A. Bailey, the Bailey Research Career Development Award is intended to foster research that is innovative, increases knowledge and has practical applications. Any full-time tenured associate professor or professor may apply. One award of $50,000 per year for two or three years will be made. Interested individuals should email their application to Joe Colletti (colletti@iatate.edu) by March 2. More

CERES Trust 2015 Graduate Student Research Grant Program

The Ceres Trust, a privately-administered Midwest-based charitable trust, focuses on the support and promotion of organic and sustainable agriculture. Up to 10 one-year grants of up to $10,000 each will be awarded to support organic research by full-time graduate students enrolled at accredited colleges and universities in the North Central region. Applications are due March 31. More

Webinar: NIH Structure for SBIR Funding

The National Institutes of Health will present the webinar, Understanding the Health and Human Services-NIH Structure When It Comes to SBIR Funding, on Jan. 28, 2 to 3:30 p.m. The webinar is part of a series that explores topics relevant to the Small Business Innovation Research and Small Technology Transfer Research programs. More

Workshop: Documenting (and Boosting) Your Research Impact Workshop

Documenting (and Boosting) Your Research Impact is a workshop relevant to faculty in all disciplines and ranks and will provide examples of ways to document and improve scholarly impact. Participants should bring a laptop to set up a Google Citations Profile, to create an ORCID profile and for other hands-on experience. The workshop will be held Feb. 16, 3:10 to 4 p.m. in 2019 Morrill Hall. Space is limited. Registration can be completed through Access Plus. More

NSF Notice: New Steps to Enhance Transparency and Accountability

The National Science Foundation has issued a notice on the role of Primary Investigators in helping to prepare public award abstracts to enhance transparency and accountability on the justification for use of federal funds on projects. Abstracts for projects funded by NSF must explain the project’s significance,
and serve as public justification by articulation how the project serves the national interest by promoting progress of science, advancing nation health, prosperity and welfare, or to secure national defense. More
