CR-SARE Announces 2018 Call for Research and Education Preproposals

The 2018 North Central Region Sustainable Agriculture Research and Education Program (NCR-SARE) Research and Education Grant Program Call for Preproposals is now available [online](#).

NCR-SARE's Research and Education (R&E) program supports sustainable agriculture innovators with competitive research and education grants. Individual grants range from \$50,000 to \$200,000. NCR-SARE expects to fund about nine to ten projects in the twelve-state North Central Region.

NCR-SARE will be accepting online submissions for the Research and Education Grant Program using our online submission system. More information about the online submission system can be found in the call for preproposals. The deadline for Research and Education Program preproposals is October 19, 2017 at 4pm CDT.

NCR-SARE administers each of its grant programs with specific goals, audiences, and timelines. Funding considerations are based on how well the applicant presents the problem being addressed, its relevance to sustainable

agriculture in the 12-state North Central region, farmer-rancher engagement in the project, and how well it aligns with NCR-SARE's goals.

Funding decisions are made by a regional Administrative Council (AC), with review from a Technical Committee. The Administrative Council is a collection of producers, university representatives, nonprofit group interests, Extension and NRCS people, other government employees, and agribusiness representatives. This group sets research priorities and recommends projects for funding.

Each state in SARE's North Central Region has one or more State Sustainable Agriculture Coordinators who can provide information and assistance to potential grant applicants. Interested applicants can find their State Sustainable Agriculture Coordinator online.

For questions or additional information regarding the R&E Grant Program, contact Beth Nelson at bethnelson@umn.edu.
